The Cleansing Demulcent and Bacteriostatic actions of ARGYROL aid the natural defense mechanism without disturbing the normal physiology of the mucous membranes. By avoiding the vicious circle of vasoconstriction and compensatory congestion so common with many vasoconstrictors, restoration of normal function is more readily attained.

gives Bacteriostasis Without Irritation Decongestion Without Rebound

The Three-Fold Action of ARGYROL

- ARGYROL is decongestive, without irritation to the membrane, and without ciliary injury.
- ARGYROL is powerfully bacteriostatic, yet is non-toxic to tissue.
- ARGYROL stimulates secretion and cleanses, thereby enhancing Nature's own first line of defense.

Three-Fold Approach to Para-nasal Therapy

- 1. The nasal meatus . . . by 20 per cent ARGYROL instillations through the nasolacrimal duct.
- The nasal passages . . . with 10 per cent ARGYROL solution in drops.
- The nasal cavities . . . with 10 per cent ARGYROL by nasal tamponage.

ARGYROL the Physiologic Anti-infective with broad, sustained action

Made only A. C. BARNES COMPANY • NEW BRUNSWICK, N. J.

ARGYROL is a registered trade mark, the property of A. C. Barnes Company

STERILIZE the stopper, insert a sterile hypodermic needle, and withdraw the required dose. It is that simple to prepare an injection of B complex vitamins from Ampoules 'Betalin Complex' (Vitamin B Complex, Lilly). This prepared solution contains the five most essential vitamins of the B complex in convenient, ready-to-use, 10-cc. rubber-stoppered ampoules.

The date appearing on each package of Ampoules 'Betalin Complex' indicates the period for which the solution will retain full potency provided it is properly stored.

Ampoules 'Betalin Complex' may be used intravenously or intramuscularly and, when added to dextrose infusions, will prevent acute avitaminosis. They are quickly available through your usual source of medical supplies.

Useful for preoperative and postoperative multivitamin supplementation, in severe deficiency syndromes and other conditions requiring parenteral therapy, and for addition to parenteral nutritional fluids. Available in 2-cc ampuls, boxes of 6, 25, and 100.

GOUNGIL-AGGEPTED

AMIGEN
for parenteral administration
of amino acids

The function of Amigen and Protolysate is to supply the amino acids essential for nutrition. Both can be given in place of protein when protein cannot be eaten or digested, or in addition to protein when the protein intake is insufficient. Administered in adequate amounts, they prevent wastage of protein, restore previous losses, or build up new body protein.

COUNCIL - ACCEPTED

PROTOLYSATE

PROTOLYSATE

for oral and tube feeding

of amino acids

Like Amigen, Protolysate is an enzymic digest of casein and consists of amino acids and polypeptides. Like Amigen, Protolysate supplies the nitrogen essential for maintenance, repair and growth.

Unlike Amigen, which may be employed both orally and parenterally, Protolysate is designed only for oral use.

1 lb. cans at drug stores

MEAD JOHNSON & CO., EVANSVILLE 21, INDIANA

Herman von Helmholtz (1821-1894)

proved it in ophthalmology

Helmholtz's greatest contribution to medicine was his exhaustive researches on color vision. The famous Young-Helmholtz theory resulted from his studies which confirmed and elaborated the findings of Young. His every work showed—experience is the best teacher!

Yes, experience is the best teacher in smoking too!

DURING the wartime cigarette shortage, people smoked many different brands—more than they would normally try in years. That's how so many learned the differences in cigarette quality. And from that experience millions more smokers came to prefer Camels. Today more people are smoking Camels than ever before.

But, no matter how great the demand, only choice tobaccos, properly aged, and blended in the time-honored Camel way, are used in Camels.

According to a recent Nationwide survey:

More Doctors Smoke **Camels**

than any other cigarette

PAVATRINE in dysmenorrhea

Dysmenorrhea in Industry Treatment with a New Antispasmodic

F. A. VIGGIANO, M.D., HE increased need for women in industry makes

it imperative that the industrial physician give greater attention to illnesses which cause absenteeism greater attention to innesses which cause absence is maning female employees. In a National Health Survey among female employees. The A National Health Survey of 92 cities of 22 cities of of 83 cities of

EVIDENCE of its value

Recent confirmation of the value of the non-narcotic smooth muscle antispasmodic Pavatrine in the relief of primary dysmenorrhea is presented in a study by Viggiano* in women in industry.

Of 221 patients reporting with dysmenorrhea as their primary symptom, 76.6 per cent obtained complete or moderate relief (able to return to work promptly) with Pavatrine. Only 10.7 per cent reported no improvement.

The author summarizes: "From this evidence it would appear that Pavatrine provides a high percentage of prompt alleviation of dysmenorrheic pain."

PAVATRINE

125 mg. (2 gr.)

PAVATRINE WITH PHENOBARBITAL

Pavatrine—125 mg. (2 gr.) Phenobarbital—15 mg. (1/4 gr.)

Both forms are available in bottles of 100 and 1000 tablets. Pavatrine is the registered trademark of G. D. Searle & Co., Chicago 80, Illinois *Viggiano, F. A.: Indust. Med. 15:632 (Nov.) 1946.

SEARLE

PFIZER PENICILLIN

. . . crystalline now in wide demand

During the years in which penicillin has been produced in quantity, the name of Pfizer has been associated consistently with a high quality source of this antibiotic.

Crystalline Sodium Penicillin G (benzylpenicillin) is shown in the photomicrograph above. This, with crystalline potassium penicillin G, provides a choice of the two types most demanded today — types with which no refrigeration is necessary. These water soluble crystalline salts have received wide acceptance for parenteral administration.

These crystalline salts of penicillin G are finding greater use by pharmaceutical manufacturers for the preparation of various dosage forms, viz.: peanut oil and wax mixture, tablets for oral administration, troches and ointments.

As the world's largest producer of penicillin, Pfizer draws upon a depth of experience which cannot be duplicated. Chas. Pfizer & Co., Inc., 81 Maiden Lane, New York 7, N. Y.; 444 West Grand Ave., Chicago 10, Ill.; 605 Third Street, San Francisco 7, Calif.

Ferrous iron in its most agreeable form

FERGON is Stearns ferrous gluconate...stabilized to remain in the ferrous state — generally accepted as the superior form of iron for humans, from the standpoint of absorption as well as toleration. 1, 2

THERAPEUTIC APPRAISAL: Better Tolerated — Fergon is only slightly ionized, therefore virtually non-astringent, non-irritating... may and should be administered before meals. Better Absorbed, Fergon is soluble, and available for absorption, throughout the entire pH range of the gastro-intestinal tract. Better Utilized, as shown by comparative clinical studies.³

INDICATED in the treatment and prevention of hypochromic anemias; especially valuable in patients intolerant to other forms of iron.

DOSAGE: Average dose for adults is three to six (5 gr.) tablets; for children, one to four $(2\frac{1}{2}$ gr.) tablets or one to four teaspoonfuls of elixir daily.

SUPPLIED as 0.325 Gm. (5 gr.) tablets, bottles of 100, 500 and 1000; 0.163 Gm. ($2\frac{1}{2}$ gr.) tablets, bottles of 100; 5% elixir, bottles of 6 and 16 fl. oz.

WHEN HYPOTENSIVE THERAPY IS INDICATED

HEPVISC, a synergistic combination of hexanitrate of mannitol with viscum album, is a safe and effective agent for bringing about:

- 1. A sustained reduction in blood pressure.
- 2. Relief from subjective symptons.

For optimum results the action of a hypotensive drug should be gradual and prolonged. The fall in blood pressure produced by Hepvisc begins from fifteen to thirty minutes after administration, reaches its maximum in from one to two hours, and persists for from four to six hours.

The effectiveness of Hepvisc in controlling the headache, dizziness, tinnitus and other cerebral symptoms of hypertension is particularly gratifying to many patients.

Dosage: 2 tablets three or four times daily as needed. Supplied in bottles of 50 tablets, 500's and 1000's.

Exclusively for ALCOHOLISM and DRUG ADDICTION

We regard alcoholism and the varied drug habits, including barbiturism, as both physiological and psychological sicknesses. Our treatment is a hospital procedure which eliminates craving by a method of detoxication and quickly restores normal body functions. Following this our psychological approach to the problem has proven most successful.

We have perfected the treatment of drug addiction over a period of forty years. It is now generally accepted as standard. It is completed within a definite period, at a fixed charge, and entails a minimum of discomfort. The patient is assured of absolute privacy.

Our advertisement also appears in the A.M.A. Journal.

IN A NUTSHELL...THE SPIDER

In Evangeline's time the spider had diversified therapeutic effectiveness. Malaria could be cured by wearing a spider hung around one's neck in a nutshell. A remedy for whooping cough was a spider wrapped in a piece of muslin, pinned over the mantlepiece. In folk-medicine nature often cured the disease while the therapy amused the patient.

Though these simple remedies of our pioneer ancestors may have proven efficacious, the modern physician of today prefers to base his treatment on scientifically developed drugs compounded of quality chemicals.

For more than three-quarters of a century American physicians have been specifying Mallinckrodt Prescription Chemicals with confidence, secure in the knowledge that every chemical bearing the Mallinckrodt trade-mark is manufactured to the most rigid standards of purity and potency.

Sahli-Adams Combination Hemometers and Hemacytometers are available with two types of hemometer housings. On both models the housings are made of molded plastic which is durable and corrosion-resistant, and are equipped with translucent opal white glass for a matching background. One has square non-fade Plano-Parallel precision double glass standards. These are rectangular plates made up of two color components and ground and polished to the proper thickness. Due to the plane surfaces of these standards, entirely uniform comparison fields are obtained. The other has non-fade Prismatic double glass standards. In these the standards and the measuring tube form a continuous color field, omitting the vertical bars to give more accurate and easier color matching.

ADAMS

HEMOMETER OUTFITS

Sahli-Adams Hemometers are supplied in an attractive, waterproof, leatherette covered case with velvet-lined compartments. In addition, space is allowed for a tray compartment to hold a complete hemacytometer outfit. If the instrument is ordered without the hemacytometer outfit a dummy compartment is supplied which at any time can be replaced with the A-2506/CT Hemacytometer Tray at \$1.00.

A-2505 Sahli-Adams Plano-Parallel Hemometer with non-fade rectangular standards and square measuring tube, complete, with directions.

Each \$31.00

STILL AVAILABLE! 32 page booklet on Blood Testing Instruments. Write for your free copy 223R4/AM.

RAPID clinical response in the syndrome of hypochromic (secondary) anemia usually requires more inclusive therapy than iron medication alone. The characteristic lethargy, anorexia, listlessness, and disturbed gastrointestinal function reflect the many metabolic derangements involved. Hence effective therapy must also be directed against these associated symptoms before complete return of well-being can be produced.

The well-balanced, rational formula of Livitamin With Iron is designed to combat the many manifestations of the protean syndrome characteristic of hypochromic anemia. It provides not only highly available iron in nonionic form, but also generous quantities of B complex vitamins as well as fresh liver (as liver concentrate) containing the fraction in which the recognized antianemia principle is found. Thus existing vitamin deficiencies, so often the cause of anorexia and nutritional involvements, are promptly overcome, further adding to the patient's subjective improvement as the anemia itself is corrected.

Livitamin With Iron proves highly efficacious in all types of secondary anemia, whether due to impaired iron intake, chronic blood loss, or chronic systemic

infection. It is especially valuable in the anemia of children which is so often associated with malnutrition and vitamin deficiencies. Dosage: 3 to 4 teaspoonfuls three times daily.

Each fluidounce of Livitamin With Iron, prepared with an attractive, pal-atable vehicle, presents: atable vehicle, presents:

Iron and Manganese Peptonized 30 gr.

(Equivalent to 45 mg. elementary Iron)

Iron Peptonized, N.F. ... 12½ gr.

(Equivalent to 140 mg. elementary Iron)

WHEN BEER CAN HELP RECOVERY . . .

Is one beer better than another for convalescents? Yes, we believe that a true premium beer, such as Trommer's White Label, has distinct advantages in the convalescent diet.

Trommer's White Label Premium Beer is brewed from an old-world formula calling for the use of one grain only—fine barley-malt*, with hops. The characteristic lightness which has made this beer famous can be traced to this costlier one-grain brewing method.

The fine flavor and sparkling refreshment of Trommer's White Label often have a good psychological effect on patients. This preference extends also to those who enjoy a beer that will stand comparison with the finest European brews. May we suggest that you give this extra light beer a trial for your personal use?

TROMMER'S

*Malted barley is rich in an enzyme which digests starch in the production of maltose.

(From "Accepted Foods and Their Nutritional Significance")

ORALLY ACTIVE MENOPAUSAL THERAPY... with a plus

Prompt relief of distressing menopausal symptoms may be expected with the use of "Premarin" administered by mouth. Most gratifying to the patient also is the emotional uplift which usually follows treatment and is invariably described as a "sense of well-being." Therapy with a "plus"...

"Premarin" provides naturally occurring conjugated estrogens for effective therapy by the oral route with comparative freedom from untoward side effects.

"Premarin" is available as follows:

 Tablets of 2.5 mg.
 bottles of 20 and 100.

 Tablets of 1.25 mg.
 bottles of 20, 100 and 1000.

 Tablets of 0.625 mg.
 bottles of 100 and 1000.

 Liquid, containing 0.625 mg. in each 4 cc. (1 teaspoonful)
 bottles of 120 cc.

While sodium estrone sulfate is the principal estrogen in "Premarin," other equine estrogens... estradiol, equilin, equilenin, hippulin... are also present as water-soluble sulfates. The water solubility of conjugated estrogens (equine) assures rapid absorption from the gastrointestinal tract.

CONJUGATED ESTROGENS

Relief of ARTHRITIC PAIN

When the pain of arthritis becomes unbearable and other analgesics fail, emergency relief can readily be obtained with Demerol hydrochloride. In addition to subjective improvement, prolonged Demerol administration brings about changes in objective findings. In a published report of 256 cases, two outstanding measurable effects were relief of secondary muscle spasm and increased joint mobility. Ampuls (2 cc., 100 mg.); vials (30 cc., 50 mg./cc.); tablets (50 mg.); powder (15 Gm.) for prescription purposes.

DEMEROLL HYDROCHLORIDE

Brand of meperidine hydrochloride (isonipecaine)

Warning: May be habit forming. Narcotic blank required.

A simple, disposable

Penicillin Oil-and-Wax

Syringe!

No Cartridges to insert or change — as simple as your favorite Luer

You don't have to be a mechanic to work Cutter's Penicillin Oil-and-Wax syringe! No "parts" to handle. It comes all-of-a-piece, ready to use "as is."

Pull-back plunger permits you to test for accidental puncture of a vein, just as you always do. If no blood is aspirated—inject with confidence.

Penicillin Oil-and-Wax Cutter is available in 300,000 units, 200,000 units, and 100,000 units per cc.

FLUID! No heating—no refrigerating

Penicillin Oil-and-Wax Cutter is specially compounded to flow freely at room temperature, is easily injectable—behaves like salad oil rather than butter.

Syringe has "knee-action" hilt to act as shock absorber. The needle is mounted in rubber, allowing "play" without danger of snapping needle.

If your pharmacist hasn't these easy, disposable syringes in stock now—ask him to order you a supply to save time and nuisance in your practice.

CUTTER LABORATORIES, Berkeley 1, Calif.

Are babies too much like people?

Babies would be a lot less trouble if they'd automatically like all the things that are good for them. But they won't.

So Gerber's can't stop at making baby foods that are merely "good for" babies. It isn't nearly enough that the high nutritional values of Gerber's Baby Foods please doctors.

We have to be specialists in making foods that babies <u>like</u>
<u>better</u>, too. In fact, one of the reasons Gerber's please so many
mothers is that babies like them so well.

Take Gerber's 3 Cereals. All 3 have the "just right" taste and texture that babies go for. And all three are enriched with added iron, calcium, and vitamin B-complex.

From Cereals through Strained and Chopped Foods . . . there isn't a single one of all Gerber's 34 baby foods that isn't specially prepared to suit baby tastes.

A card to Gerber's, Dept. AM6-7, Fremont, Mich., will bring you samples of the cereals, together with professional reference cards.

"The diagnosis of deficiency disease," states Jolliffe, "is frequently missed because it is not looked for."*

But once recognized, the sick patient with mixed vitamin deficiencies must be treated with the essential vitamins in doses of therapeutic magnitude. No simple multiplication of maintenance multi-vitamin preparations is practical — for there is no fixed ratio between the doses for therapy and those for maintenance.

For doses of true therapeutic magnitude prescribe SQUIBB THERAPEUTIC FORMULA. A single capsule contains these massive doses:

Vitamin A	25,000 units	5	times >	
Vitamin D	1,000 units	11/4	times	
Thiamine HCI	5 mg	21/2	times (mes (maintend
Riboflavin	5 mg	2	times /	by the l
Niacinamide	150 mg	71/2	times \	of the N
Ascorbic Acid				,

maintenance level recommended by the Food and Nutrition Board of the National Research Council
